REPLY BRIEF ON APPEAL BEFORE THE BOARD OF APPEALS AND_INTERFERENCES

commissioner for Patents .O.Box 1450

lekandria, VA 22313-1450

Sir:

This is a Reply Brief to the Examiner's Answer mailed Movember 28, 2005.

us920000234us1

GE 2/10 * RCVD AT 1/29/2006 3:05:22 AM [Eastern Standard Time] * SVR:USPTO-EFXRF-6/24 * DNIS:2738300 * CSID:512 473 8803 * DURATION (mm-ss):08-58 🗧

In the Answer, the Examiner makes another argument in response to Applicants' argument that the Examiner is combining the two references in the light of Applicants' own teaching. Applicant did not intend to argue that there was insufficient basis for one skilled in the art to look at both kikinis and Donoho in an attempt find Applicants invention. Applicants argued that the rejection used Applicants' disclosure as a guideline, and then picked and combined elements from each of the Kikinis and Donoho references based solely on Applicants' own teaching.

The present invention requires the transmission from a source of a single Markup Language (HTML) document containing two versions of the data content: a first version of the content which is displayable at standard display stations, and a condensed version of the same data content displayable on smaller palm-type displays combined with palm-type computer with the means for accessing the condensed version from the transmitted document.

Kikinis recognizes the need to condense data content of HTML documents to fit smaller personal device displays. However, as the Examiner concedes, Kikinis does not provide the two versions in a single HTML document. The Examiner gdes to Donoho for this teaching. The Donoho patent is a very extensive description of a set of Advice Provider intelligent server systems which gather information from the Web tallored to the needs of a set of subscribing Advice Consumers and transmit such advice to the Consumers. this extensive general disclosure which is not related to the present invention, in Donoho, the Examiner has found a segment at col 22, lines 15-22 which may only be pertinent if interpreted in light of Applicants' own teaching. is a general statement of an E-mail message with two alternative versions, the selection of which is determined AUS920000234US1

PAGE 3/10 ° RCVD AT 1/29/2006 3:05:22 AM [Eastern Standard Time] ° SVR:USPTO-EFXRF-6/24 ° DNIS:2738300 ° CSID:512 473 8803 ° DURATION (mm-ss):08-58

Advice Consumer being supported. When read in the light of Denoho's teaching, this can only mean that two versions of the same message are available in Donoho's Advice Provider servers. The Advice Provider can select the appropriate version suitable to the needs of the Advice Consumer. This selected version in Donoho would then be transmitted as a single version of the message based on the Advice Consumers needs and not, as in the present invention, as a document containing two versions from which the receiving palm computer could select the version appropriate to the receiving palm-type computer.

There still is no suggestion in Donoho of the element of the present invention wherein there are means in the personal palm-type computer for directly accessing the second i.e. condensed version of the displayable data from the transmitted message document.

Thus, any suggestion of a single transmitted document with two versions of a message from which the receiving computer had means to select the appropriate version could only be made in the light of Applicants' own teaching.

Respectfully submitted

REPLY BRIEF ON APPEAL BEFORE THE BOARD OF APPEALS AND INTERFERENCES

Commissioner for Patents F.O. Box 1450

Alexandria, VA 22313-1450

Sir:

This is a Reply Brief to the Examiner's Answer mailed November 28, 2005.

AUS920000234US1

GE 5/10 * RCVD AT 1/29/2006 3:05:22 AM [Eastern Standard Time] * SVR:USPTO-EFXRF-6/24 * DNIS:2738300 * CSID:512 473 8803 * DURATION (mm-ss):08-58 |

In the Answer, the Examiner makes another argument in response to Applicants' argument that the Examiner is combining the two references in the light of Applicants' own teaching. Applicant did not intend to argue that there was insufficient basis for one skilled in the art to look at both Kikinis and Donoho in an attempt find Applicants invention. Applicants argued that the rejection used Applicants' disclosure as a guideline, and then picked and combined elements from each of the Kikinis and Donoho references based solely on Applicants' own teaching.

The present invention requires the transmission from a source of a single Markup Language (HTML) document containing two versions of the data content: a first version of the content which is displayable at standard display stations, and a condensed version of the same data content displayable on smaller palm-type displays combined with palm-type computer with the means for accessing the condensed version from the transmitted document.

Kikinis recognizes the need to condense data content of HTML documents to fit smaller personal device displays. However, as the Examiner concedes, Kikinis does not provide the two versions in a single HTML document. The Examiner goes to Donoho for this teaching. The Donoho patent is a very extensive description of a set of Advice Provider intelligent server systems which gather information from the Web tailored to the needs of a set of subscribing Advice consumers and transmit such advice to the Consumers. In this extensive general disclosure which is not related to the present invention, in Donoho, the Examiner has found a segment at col 22, lines 15-22 which may only be pertinent if interpreted in light of Applicants' own teaching. Theme a general statement of an E-mail message with two diternative versions, the selection of which is determined AUS920000234US1
